WHAT WE ARE

BREAKING THE CHAINS. A JOB IN EVERY FEED.

WE ARE A PAID-ENGAGEMENT AND CREATOR PLATFORM.

You create. If it is approved, it goes live. People get paid to engage with it. You get paid when that content performs. The company also runs ads on its own platform. Revenue from ad packs goes back into the token (buybacks and burns). That is the whole model.

GET PAID TO CREATE. GET PAID TO CLICK. SEND REAL TRAFFIC. FEED THE TOKEN.

WHAT WE ARE TRYING TO DO

Break the old setup where only platforms and agencies get paid.

Give anyone, anywhere, a simple job: engage with a post that meets the rules, and get paid for it.

If you need reach – likes, follows, views, comments – we send the herd. Real people. Real clicks. Real engagement. Not empty bots as the product.

BREAKING THE CHAINS

SLAUGHTERHOUSE CELL. NIGHT. BLOOD-RED MOON. A 99¢ SIGN STARING BACK.

THE APPOINTMENT

IF I AM MEAT, WHY DO I STILL HAVE A NAME?

Astro Bull was born and raised inside a slaughterhouse. Day after day he stares through the bars at a sign that reads **99 cent beef patty** – the fate waiting if nothing changes.

One night a neon feather drifts into the cell. Held to the moonlight it glows. Permission. Mission: break the chains, burn the slaughterhouse, start a new life.

THE CAPE

SNAP

MOOOOON

YOU DO NOT GET TO PRICE ME.

The feather tugged like a compass. Past the bars. Into a locker that should have held rust. Inside: a black cape waiting like a second skin. He put it on. The power doubled. The last chain hit the floor like a verdict.

He did not just escape. He became the Breaker of Chains. Destination clear – even if the road was not. More animals from the slaughterhouse get their own stories. A horror film is the long game. Community content writes the next chapter.

THE SLAUGHTERHOUSE

astrobull.xyz is the slaughterhouse. Each room has a job. Do not mix them up.

TOKEN LAUNCHPAD – STILL SEALED

Slaughterhouse token pad (/launchpad) stays **coming soon**. When it opens: hold 1,000 \$ASTROBULL to create. Bonding-curve community coins under slaughterhouse animals. NFTs do not replace the token pad.

FOUR WAYS MONEY MOVES

Keep these as four pillars. Do not mix them.

1. GET PAID TO CREATE

You submit content. We review it against clear criteria. If it is accepted, it is posted on our platform. You can earn from that post.

2. BOUNTIES ON POSTS

Approved posts can carry a bounty. The bounty pays people to engage. That is how traffic is guaranteed instead of hoped for. Good posts get elevated because the herd is sent to them.

3. GET PAID TO CLICK

Users complete simple, allowed actions and get paid. This is the job layer: worldwide, low barrier, rules-based.

4. MONETIZE VIDEOS ON THE ACCOUNT

When a video stays on our accounts and performs, we run ads against that attention. Creators whose content is used can receive a share of that ad revenue, based on performance. We also sell ad packs and run ads on our own platform.

MONETIZATION IS THE FOURTH ENGINE.

Need 1,000 likes, 1,000 followers, or 10,000 followers? We run the campaign. The herd delivers the actions. You get the activity on the account.

That is a service, not a search engine. We sell done-for-you attention on social accounts.

ROAD + HERD + MONEY

THE ROAD TO MONETIZATION

1 SUBMIT

Send the content.

2 REVIEW

We check the rules. Pass or fail. No mystery.

3 PUBLISH

Accepted content goes on the platform.

4 STAMPEDE

Bounty plus herd equals traffic and engagement.

5 EARN

Creator pay. Click pay. Later ad-share on performing videos. Ad-pack money can support the token.

IF IT FAILS REVIEW, IT DOES NOT GO LIVE AND IT DOES NOT EARN.

SEND IN THE HERD

This is the product, not slang only.

We send real users to a specific account or post, with a bounty attached, so there is traffic and engagement instead of silence.

You buy a campaign: likes, follows, clicks, or views – delivered by people in the network, under the campaign rules.

The user in the herd sees a task, does the task, and gets paid if it passes checks.

The creator gets distribution, possible bounty lift, and possible later ad-share if that content stays in the monetized library.

SEND IN THE HERD. REAL PEOPLE. REAL TRAFFIC. REAL ENGAGEMENT.

WHERE THE MONEY GOES

MONEY IN	WHAT HAPPENS
Ad packs sold	Revenue can fund token buybacks and burns.
Ads we run on our platform	Company revenue plus possible creator share on performing videos.
Bounties	Paid to users who complete the task correctly.
Approved creator content	Paid when accepted, and when it performs.
Get paid to click	Paid to the person who clicked or completed the action.

Ad-pack revenue is designed to flow back into the token through buybacks and burns.

RULES. ANSWERS. TOKEN.

IDIOT-PROOF FAQ

Do I get paid just for posting?

Only if the content is approved and accepted. No approval, no post, no pay.

What is a bounty?

A reward attached to a post so people are paid to engage with it.

Why will my post get traffic?

Because the herd is sent to it when a bounty or campaign is active. Traffic is a product, not a wish.

What is get paid to click?

You complete a simple allowed action. If it counts, you get paid.

How do videos make money later?

Performing videos on our accounts can carry ads. A share of that marketing / ad revenue can go to the creator under the published split.

What are ad packs?

Packs we sell to run campaigns and ads. That revenue is a core stream. Part of it is designed to go back into the token via buybacks and burns.

Is monetization separate from ad packs?

Yes. Ad packs are one pillar. Platform ads and creator ad-share are another. Bounties are another. Token support is where ad-pack revenue is routed.

Is this a job?

It is paid task work: create or click under rules. It is not a salaried job unless you separately hire someone that way.

RULES OF THE HERD

- Organic-looking engagement from paid users is still paid promotion. Platforms can still flag it.
- Not empty bots as the product. Real people. Real clicks.
- Cryptocurrency is volatile. Never spend more than you can lose.
- This magazine is not financial advice and not an offer of securities.
- Always verify CA and links from astrobull.xyz and verified socials.

We run four connected revenue lines: paid creation, paid engagement (bounties and get-paid-to-click), platform advertising including ad packs, and performance-based ad-share on owned video inventory. Campaigns send real-user traffic to posts and accounts. Ad-pack proceeds are structured to support the token through buybacks and burns. Monetization is a standing pillar of the business, not an add-on.
